InXpress Extension Setup for Magento 2

Installation

- Go to the InXpress app page for Magento 2:
<https://www.inxpressapps.com/magento2.html>
- Click on the “Get the Module” green button.

InXpress[®] Home Shopify BigCommerce **Magento 2** WooCommerce ZenCart

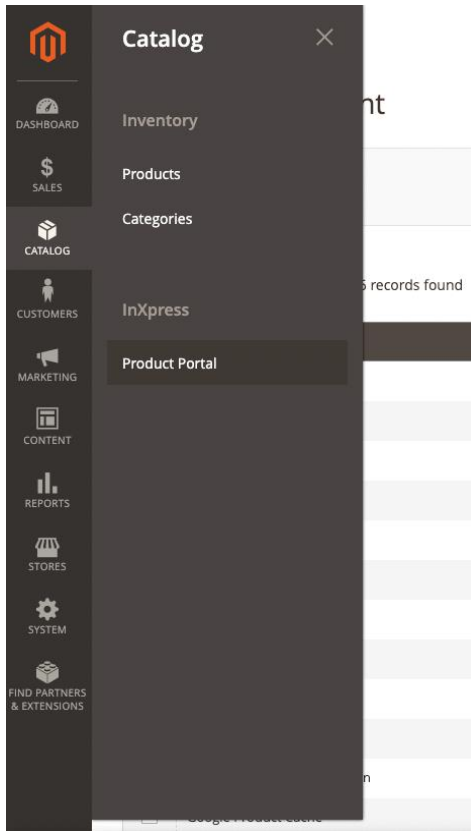

- This will take you to the page on packagist.org that hosts the module.
- Before installing the module make sure you have the store information and the Origin set in your configuration.
 - Stores -> Configuration -> General -> General -> Store Information
 - Stores -> Configuration -> Sales -> Shipping Settings -> Origin
- You will need to install the module with composer. The composer command is on the packagist.org page:
 - `composer require inxpressapps/magento2`
- Run the command in the Magento 2 directory on your host server.
- Enable the module:
 - `bin/magento module:enable InXpress_InXpressRating`
 - `bin/magento setup:upgrade`
 - `bin/magento setup:di:compile`
 - `bin/magento cache:clean`
- The extension should now be visible under Sales > Shipping Methods > DHL Express OR Sales > Delivery Methods > DHL Express depending on your version of Magento 2.

- If you are already an InXpress customer, please notify your InXpress representative that you have installed the app and are ready to have your rates linked to the app. If you are not an InXpress customer, an InXpress representative will contact you to help you sign up and request your carrier accounts.
- Your InXpress representative will notify you once your accounts have been received for new customers, and that your rates are ready. Your InXpress customer number will be used below to activate the app.

Register site with InXpress

- Click on Catalog -> "Product Portal" under the InXpress heading.

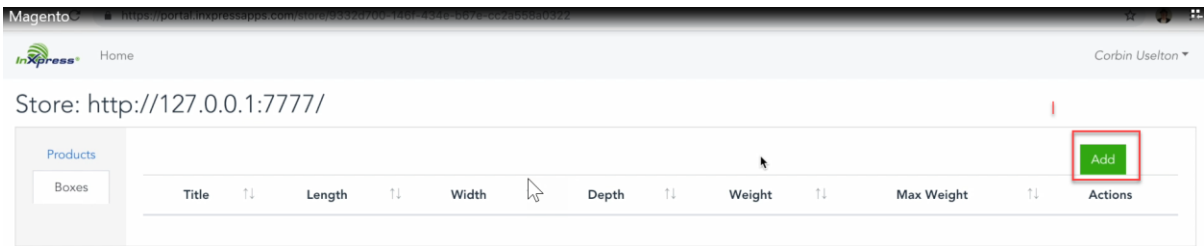

- You will land on a user account page please register or login with your email and password.

- Click on Submit button to complete Registration.

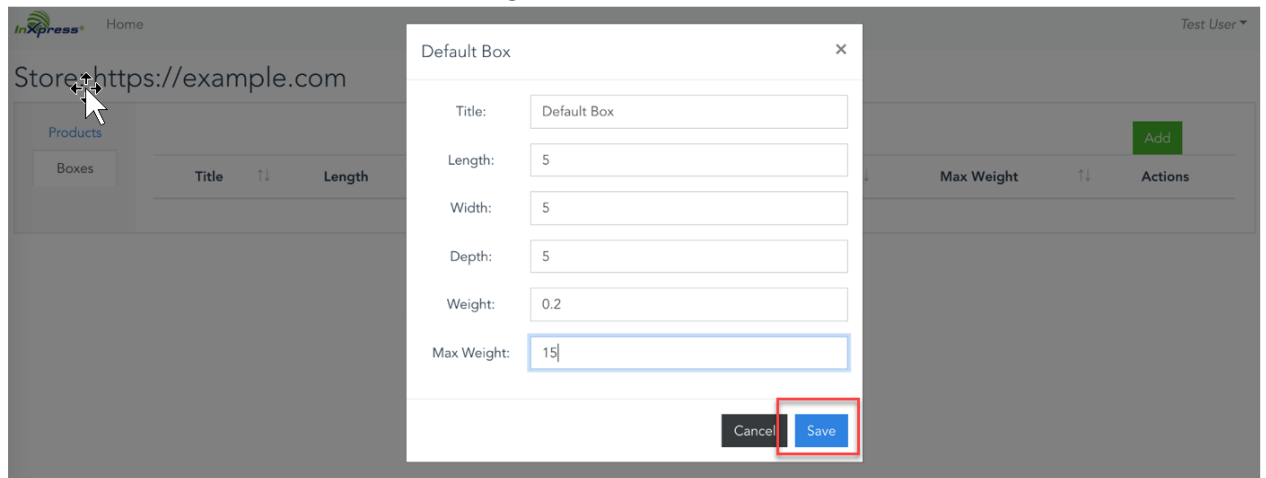

Configuring your Products and Boxes

- Now go to the boxes page to add your various shipping boxes.

- Click Add button to add new box.

- Click on save button after adding the details of the box

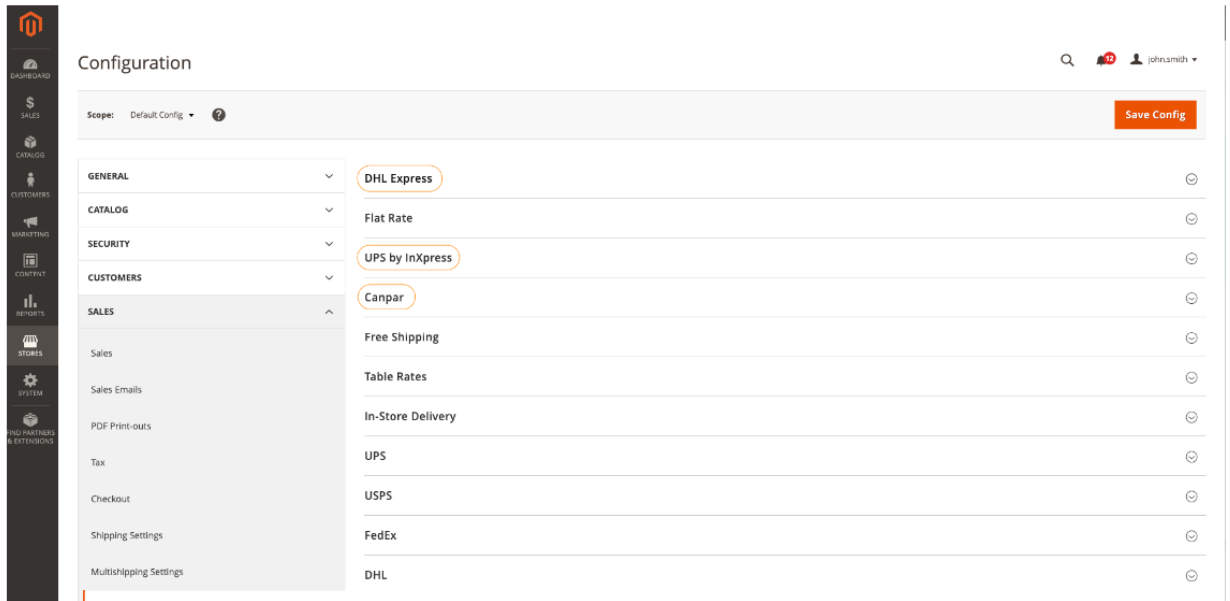

- By default, the app will use the weight from your Magento store. If you want to use different dimensions you can import your products via CSV which will contain 7 columns "platform_id, title, sku, length, width, depth, weight". You can use grams and millimeters without specifying the units of measure or you can include "in" or "lbs" in the cell to have it convert the unit of measure.

Add Shipping rate

- Navigate to System → "Stores" → "Configuration" -> "Sales" -> "Shipping/Delivery methods".

- You will see services for “DHL Express”, “Canpar”, and “UPS by InXpress” and each can be enabled independently.

- Each service does require you to fill in your InXpress customer number.

DHL Express

Enabled [website] Yes

Title [store view] DHL Express
