What is Live Rating?

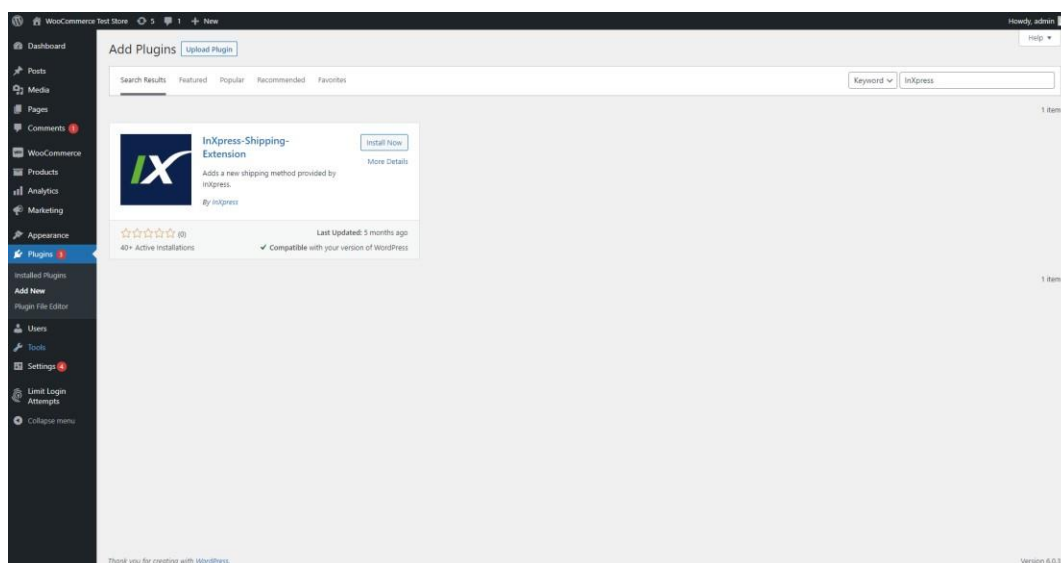

Live Rating is simply a way to display your InXpress rates in your e-commerce cart during checkout. This will provide your customers with accurate costs when deciding between different shipping options using the InXpress partner carriers.

WooCommerce InXpress App Installation

1. Log into your WooCommerce site.
2. Select Plugins and then Add New.

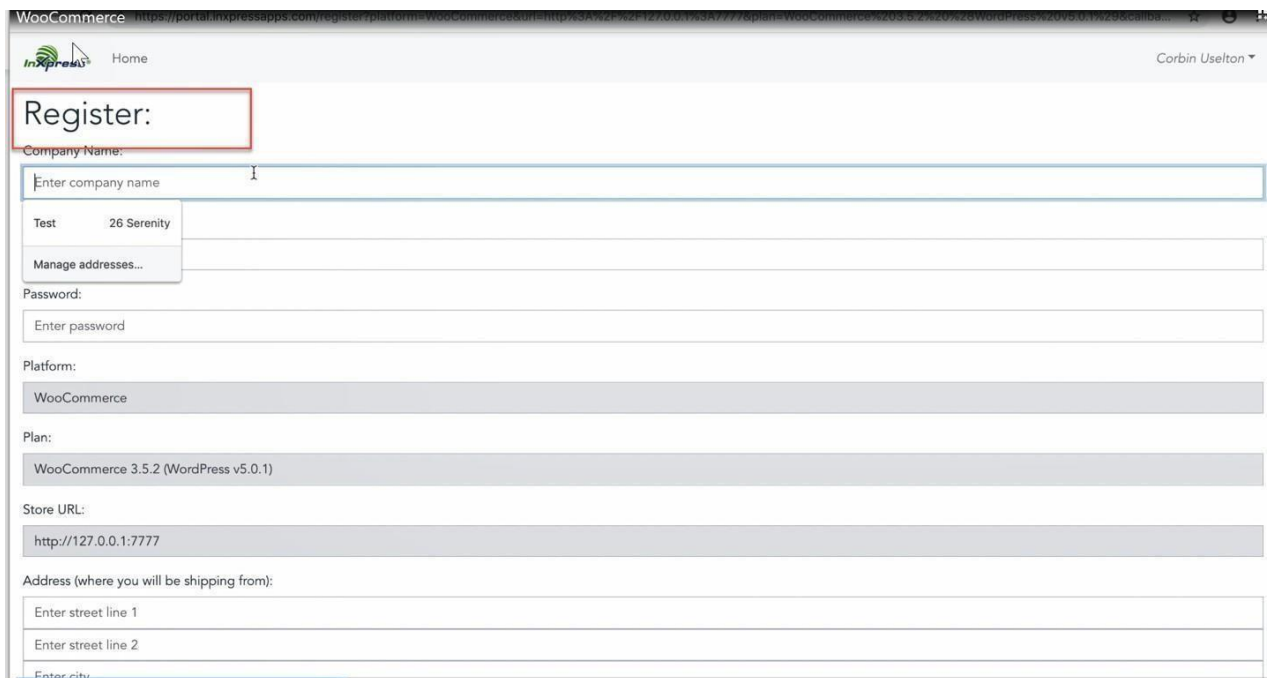

3. Search for InXpress and select Install Now once you see the InXpress-Shipping-Extension. Next select Activate.

Registering on InXpress Portal

1. Select WooCommerce and then InXpress Portal.
2. The next screen will prompt you to register for the InXpress Portal.

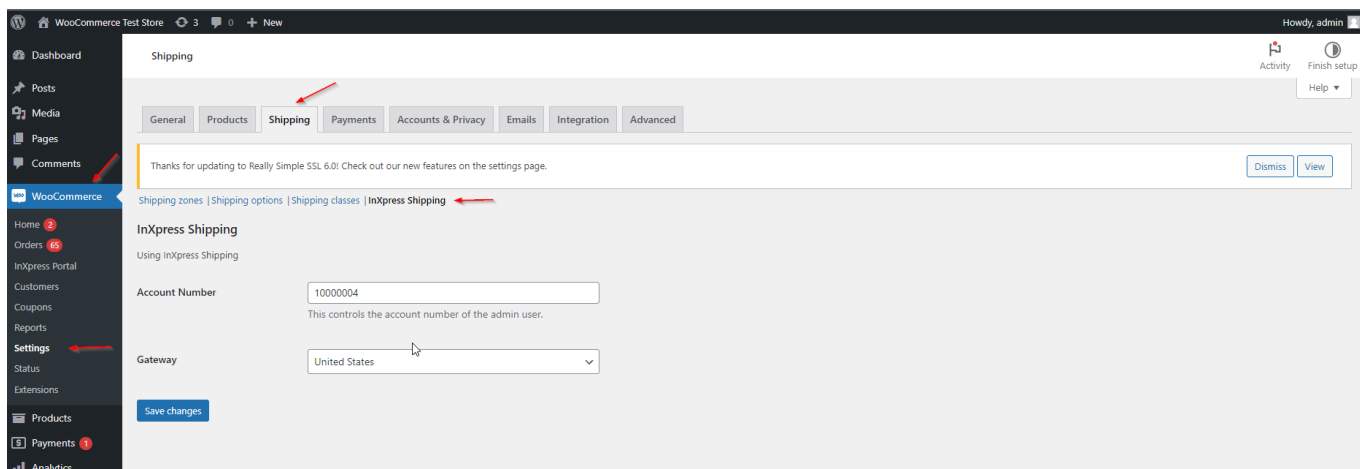

The screenshot shows the 'Register:' page of the InXpress Portal. The page has a header with the InXpress logo, a 'Home' link, and a user name 'Corbin Uselton'. The main form is titled 'Register:' and contains the following fields:

- Company Name:** A text input field with a placeholder 'Enter company name'. A dropdown menu is visible below the field, showing 'Test' and '26 Serenity', with a 'Manage addresses...' link.
- Password:** A text input field with a placeholder 'Enter password'.
- Platform:** A dropdown menu with 'WooCommerce' selected.
- Plan:** A dropdown menu with 'WooCommerce 3.5.2 (WordPress v5.0.1)' selected.
- Store URL:** A text input field with the value 'http://127.0.0.1:7777'.
- Address (where you will be shipping from):** Three text input fields for 'Enter street line 1', 'Enter street line 2', and 'Enter city'.

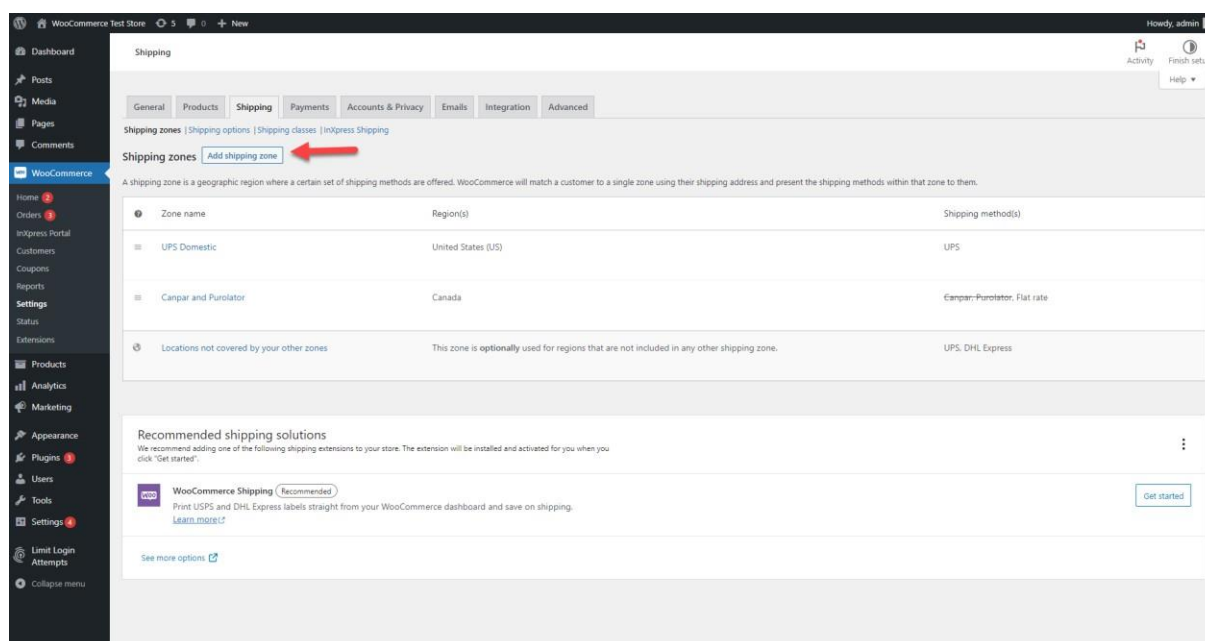

3. After filling out the form, select Submit to complete the registration.
4. Reach out to your InXpress representative once the app is installed and you have finished registering in the InXpress Portal. We will finish the connection on our side and let you know once the connection is active.

Configure Shipping Zone

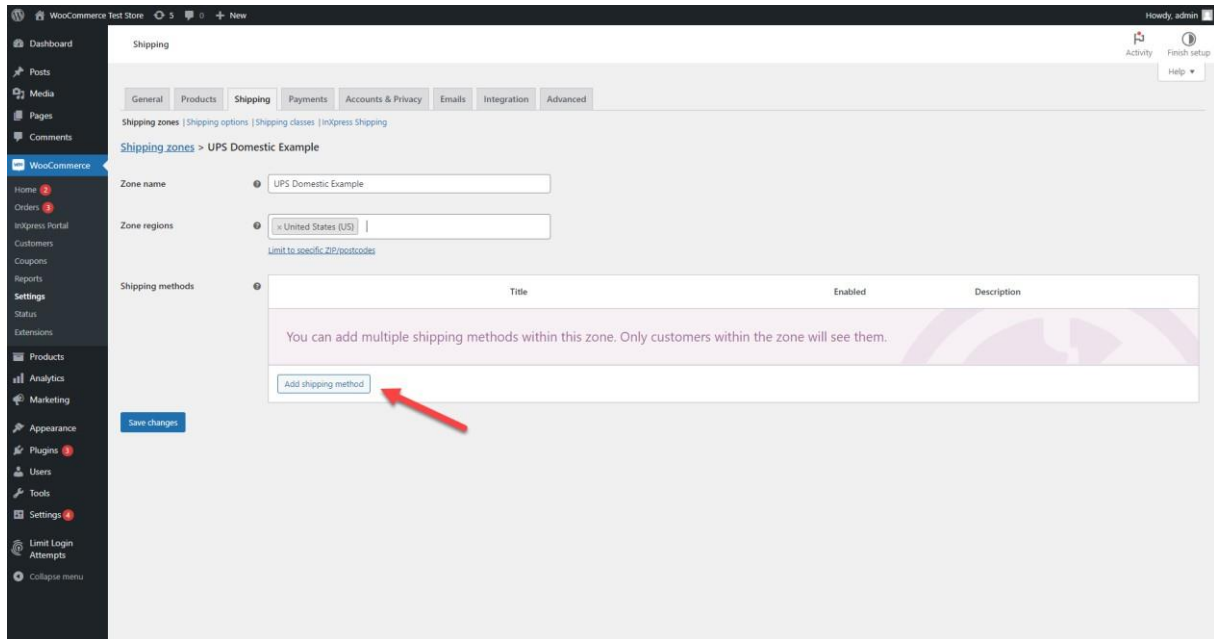

1. Navigate to the InXpress Shipping section of WooCommerce. Select WooCommerce > Settings > Shipping > InXpress Shipping. Enter your InXpress account number in the Account Number field. Select the country your store ships from for Gateway. If you do not know your account number, please reach out to your InXpress representative.

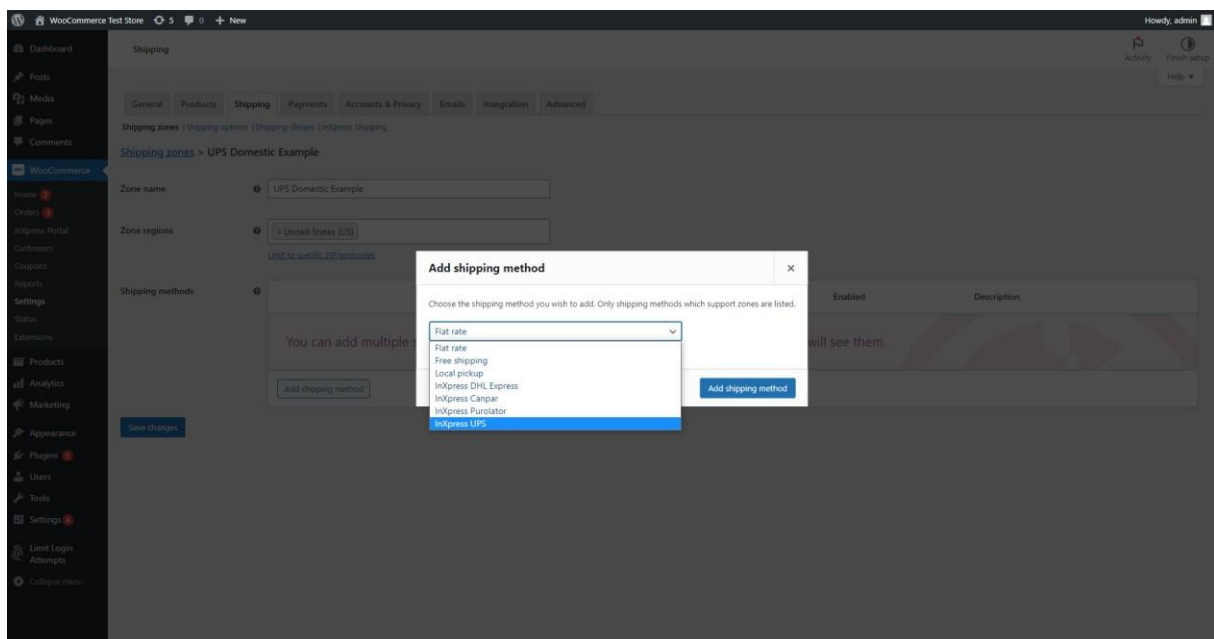

2. Click on WooCommerce > Settings > Shipping. Select Add Shipping Zone.

3. If you have not set up your zones in your WooCommerce store, select Add Shipping Zone.
 - a. For UPS Domestic, create a US only zone.
 - b. For UPS international and DHL Express, create a zone with international countries or utilize Locations not covered by your other zones.
 - c. For Canpar and Purolator, create a CA only zone.
4. Enter in a Zone name and the country or countries you wish to set up for the zone. Next select Add Shipping Method.

5. Select the Carrier you wish to enable for the newly created zone. Then select Add shipping Method.

6. Once zones are configured, you will now be able to receive rates in your WooCommerce cart.

Configure InXpress App

Configure Products

The product section of the InXpress App can be used to maintain your product section in WooCommerce. You do not have to use this section and can maintain your products in the WooCommerce product section, due to WooCommerce supporting dimensional and weight values.

1. Navigate to the products section of the InXpress app.

2. Export your products out of the WooCommerce product section.
3. Select Upload. Select file with products.

Configure Box Packing

Box packing will fit your BigCommerce products into the most appropriate box, based off the products dims and weights and the Box's dims and max weight.

1. Select the Box tab in the InXpress app.

2. Enter the dimensional and weight information for the box you are setting up.
 - a. Empty weight is the weight of the box.
 - b. Empty Capacity is the total maximum weight the box can hold.
 - c. Usable weight is the total usable weight in the box. It is calculated automatically by the InXpress app (Empty Capacity – Empty Weight = Usable weight).

The screenshot shows the InXpress app interface. A modal form is open for adding a new box. The form has the following fields:

- Title: Box Title
- Length: 1 in
- Width: 1 in
- Depth: 1 in
- Empty Weight: 0.1 lbs
- Weight Capacity: 15 lbs
- Usable Weight: (calculated)

Each field has a 'Required' label. The background shows a table with columns for Title, Length, Width, Weight Capacity, Usable Weight, and Actions. There is an 'Add' button in the top right corner of the table.

3. Click `Save changes` once done.
4. elect Save changes once all information is entered.

Settings

In the settings section you can turn on the option to add the residential surcharge to quotes in your WooCommerce cart. Please note that this is a blanket application of the surcharge and will apply to all orders!

1. Navigate to the Settings section of the InXpress App

The screenshot shows the InXpress app interface. The 'Settings' section is selected in the left sidebar. The 'Residential Fees' section is highlighted with a red arrow. The 'Include Residential Shipping Fees' checkbox is checked. A 'Save' button is visible at the bottom of the section.

2. Select the check box for Include Residential Shipping Fees.
3. Select Save.

Landed Cost Setup

IMPORTANT – Before setting up your Landed Cost settings for your WooCommerce store, you will need to utilize the Shipment Tracking Module. The Shipment Tracking module costs 49\$ per year and can be found using this link - [Shipment Tracking - WooCommerce](#). Once this module is installed, proceed with the below steps.

1. Select the Landed Cost tab in the InXpress portal.

Welcome to InXpress.

We're excited to help you grow your international and domestic markets with deep shipping discounts.

Installation and Next Steps:

Requires [Third-party carrier-calculated shipping rates](#) plan with Shopify.

- You'll soon receive an email or call from InXpress.
- Your accounts will be created and then the app will hook into your Shopify shipping settings.
- Under "Settings -> Shipping and delivery" you will see a globe icon for each region (US & Rest of World), where you can modify settings, including any handling charges.
- InXpress is now ready to configure for individual products.
- You can view the video guide and video walkthrough [here](#).

2. Read the disclaimer and accept the disclaimer to enable Landed Cost.
3. To enable Landed Cost, select the check box labeled "Enable".

4. Select how you would like to display the DDP charges in your Shopify cart.

For more details on the display differences, please reference the DDP Display section of this guide.

DDP

Disabled

5. Enter your Default HS Code. You may use the search option to find the most appropriate HS code.

Default HS Code**

Search for HS Code

4202390000

6. Select the Default Country of Origin for your products

Default Country of Origin**

United States

7. If you wish to suppress your Landed Cost detail that appears below the Shipping Rates in your cart, select the check box.

9. For the WooCommerce API key and WooCommerce API secret, navigate to WooCommerce admin page and select WooCommerce > Settings

The screenshot shows the WooCommerce admin interface. In the left sidebar, the 'Settings' menu item is highlighted with a red box. The main content area shows the 'REST API' settings page. The 'Advanced' tab is selected, and the 'REST API' section is active. The 'REST API' section has a 'Bulk actions' dropdown and an 'Apply' button. Below this, there is a table of API keys with the following data:

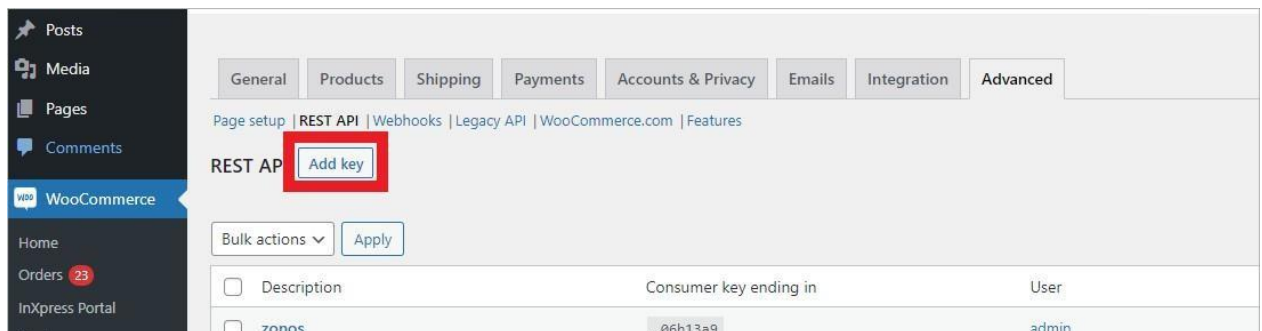

Description	Consumer key ending in	User
<input type="checkbox"/> zonos	...06b13a9	admin
<input type="checkbox"/> STG_10000004	...c84883d	admin
<input type="checkbox"/> US_WooCommerce	...362285d	admin
<input type="checkbox"/> CAUAT_10030006	...2ed9709	admin
<input type="checkbox"/> UAT_10000001	...f4bb328	admin
<input type="checkbox"/> Description	Consumer key ending in	User

10. Next, select Advanced > Rest API.

The screenshot shows the WooCommerce admin interface. In the top navigation bar, the 'Advanced' tab is highlighted with a red box. The 'REST API' section is active, and the 'REST API' menu item is highlighted in the sidebar. The 'REST API' section has a 'Bulk actions' dropdown and an 'Apply' button. Below this, there is a table of API keys with the following data:

Description	Consumer key ending in	User
<input type="checkbox"/> zonos	...06b13a9	admin
<input type="checkbox"/> STG_10000004	...c84883d	admin
<input type="checkbox"/> US_WooCommerce	...362285d	admin
<input type="checkbox"/> CAUAT_10030006	...2ed9709	admin
<input type="checkbox"/> UAT_10000001	...f4bb328	admin
<input type="checkbox"/> Description	Consumer key ending in	User

11. Select Add Key if you have not created a consumer key or secret.

12. Enter in the name for the description field. Select the user for the key. Set Permissions to Read/Write. Then select Generate API Key.
