InXpress Plugin Setup for Zen Cart

Installation

- Go to the InXpress app page for Zen Cart:
<https://www.inxpressapps.com/zencart.html>

- Click Get the Extension.
- This will download a zip file containing the extension.
- Copy the “include” directory to your Zen Cart root directory then copy files from “admin” directory to your Zen Cart admin directory.

General Settings

- In the Admin Panel go to “Modules->Shipping”. Click on InXpress row. Now you will see a button “Install Module” click on it then your module will be installed.

Modules	Sort Order	Action

Module Directory: /var/www/html/includes/modules/shipping/

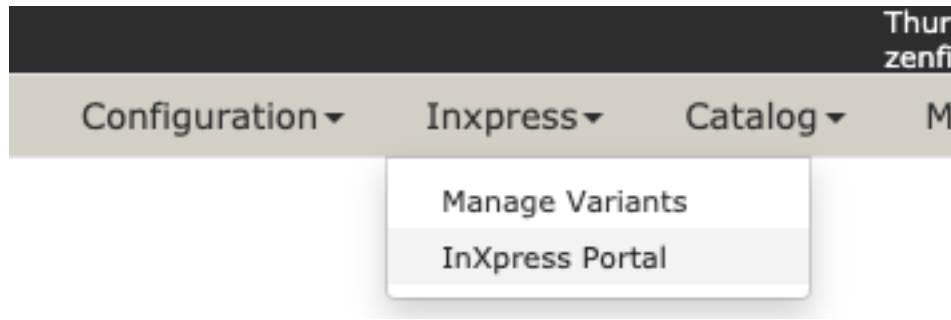

- If you are an existing InXpress customer, please notify your InXpress representative you have installed the app and are ready to have it activated. If you are not an InXpress customer, an InXpress representative will contact you to sign up and request your carrier accounts.

- Your InXpress representative will notify you once your accounts have been received, and the app has been activated. The customer number will automatically be filled in when the app is activated.

Register site with InXpress.

- Click on “InXpress” -> “InXpress Portal”.

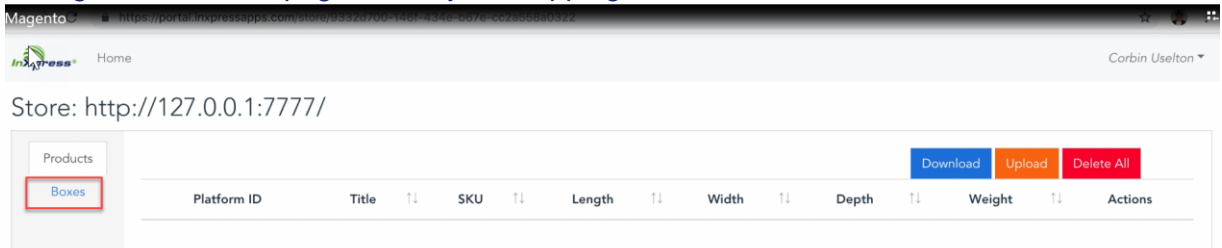

- Next screen will be where you register, else login with your email and password if you have already registered.

A screenshot of a web registration form. At the top, there is a header with the 'InXpress' logo and a 'Home' link. Below the header, the word 'Register:' is displayed. The form consists of several input fields and dropdown menus. The 'Company Name' field contains 'Test Store'. The 'Email address' field contains 'test@example.com'. The 'Password' field is masked with dots. The 'Platform' dropdown menu is set to 'ZenCart'. The 'Plan' dropdown menu is set to 'Zen Cart 1.5.7b'. The 'Store URL' field contains 'https://someteststore.com'. The 'Address (where you will be shipping from):' section has multiple fields: '123 Main St', 'Enter street line 2', 'Sanyle', '38493', 'KS', and 'United States'. At the bottom of the form is a blue 'Submit' button.

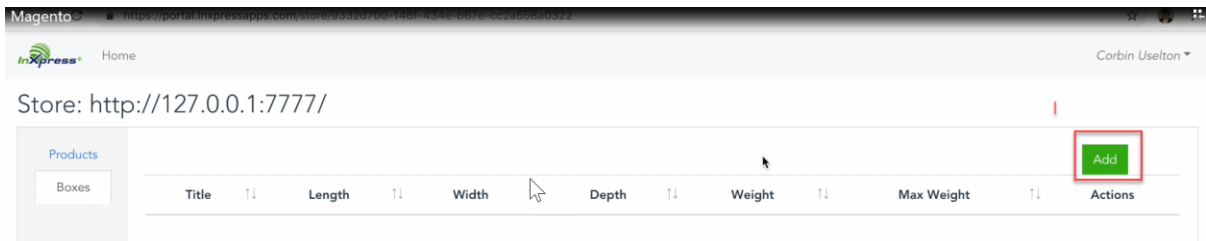

- After filling out the form click the “Submit” button to complete the registration.

Configuring your Boxes

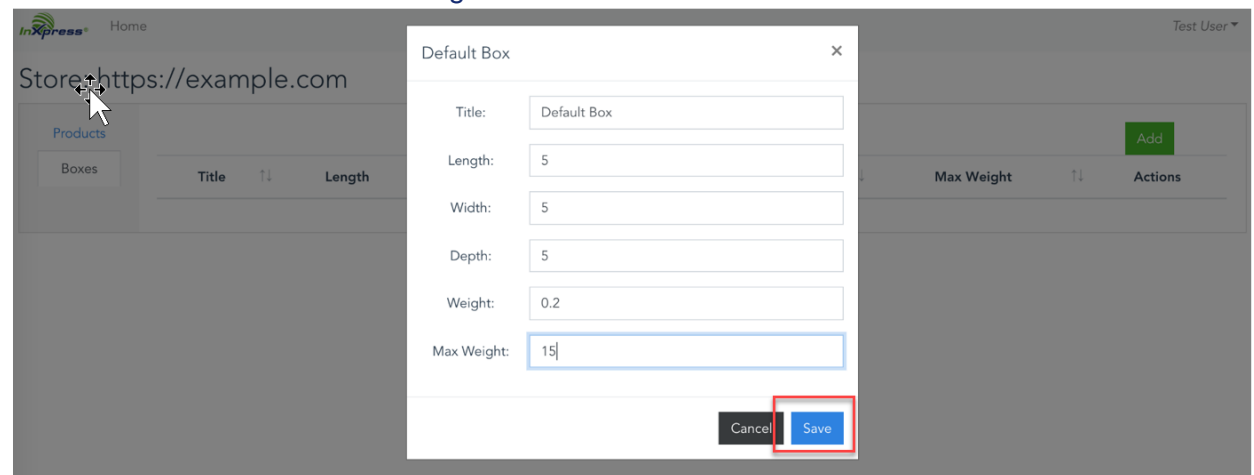

- If you would like to take advantage of box packing for your shipments, you'll need to enter your shipping boxes into the InXpress Portal.
- Now go to the Boxes page to add your shipping boxes.

- Click the “Add” button to add a new box.

- Click the “Save” button after adding the details of the box.

Setup Residential Fees

- If you ship primarily to residential addresses, you can check the “Residential Fees” box to include residential fees in the quoted shipping rates.

The screenshot shows a sidebar on the left with three menu items: "Products", "Boxes", and "Settings". The "Settings" item is highlighted. The main content area is titled "Residential Fees:" and contains a checkbox labeled "Include Residential Shipping Fees". Below the checkbox is a blue "Save" button.

Set Customer Number

- To finish the setup, you'll need to add your InXpress account number to the shipping module configuration and make sure you are enabling the correct shipping carriers (DHL / UPS). You can also enter a handling fee here.

The screenshot shows the "InXpress" shipping module configuration form. It includes the following sections and fields:

- Enabled:** Radio buttons for "True" (selected) and "False".
- UPS Enabled:** Radio buttons for "True" (selected) and "False".
- DHL Enabled:** Radio buttons for "True" (selected) and "False".
- InXpress Account Number:** A text input field containing "10000001" with a small icon to its right.
- Title:** A text input field containing "Rates by InXpress".
- Handling Type:** Radio buttons for "Fixed" (selected) and "Percent".
- Handling Fee:** An empty text input field.
- Shipping Zone:** A dropdown menu with "--none--" selected. Below it is a note: "If a zone is selected, only enable this shipping method for that zone."
- Sort Order:** A text input field containing "0" with a note above it: "Sort order of display."
- Tax Class:** A dropdown menu with "--none--" selected. Below it is a note: "Use the following tax class on the shipping fee."
- Buttons:** "Update" (red) and "Cancel" (white) buttons at the bottom.

Set Up Product Dimensions

- What is “Dimensional” Weight?
 - The dimensional weight (Dim Weight) or volumetric weight of a shipment is a calculation that reflects the density of a package. The dimensional weight is calculated and compared with the actual weight of the shipment to ascertain which is greater; the higher weight is used to calculate the shipment cost.
- For calculating Dim Weight of a product, you need to give the Length, Width and Height of the product. For this you can open the section Inxpress => Manage Variants. Here you have to import a CSV, which will contain 4 columns: id, length, width, height.

- Here you can browse for your CSV file and upload.
- Your CSV file should look like the image below. If you have left any dimensions blank in any of the rows it will not be accepted. Only those rows where all the fields are filled in are valid.

	A	B	C	D
1	id	height	width	length
2	1	10	20	30
3	2	40	50	60
4				

- Once you are ready to import the CSV, the dimensions will be saved in the database. You can also edit the dimensions of a product by clicking the row in the “Manage Variants” grid. When you click on any variant row, a page will open where you can edit the dimensions.

- You can also Add/Edit product dimensions from the product view page.
- Go to Catalog => Categories/Products and open the product for which you want to Add/Edit the dimensions. You will find the variant's field in last.

Sort Order:

Variant	L x W x H	Action
Matrox G400 32MB	8 x 10 x 2	Add/Edit

- When you click on the “Add/Edit” link, a pop-up will open where you can Add/Edit the dimensions for that product, then click on the “Save” button to save the changes.

Manage Product Dims

Variant Name	length	Width	Height	Action
Matrox G400 32MB	8 <input type="text" value="8"/>	10 <input type="text" value="10"/>	2 <input type="text" value="2"/>	<input type="button" value="save"/>

Frontend

- Once your shipping module is activated it will be displayed on the frontend inside shipping section in the checkout process.

Shipping Method:

Please select the preferred shipping method to use on this order.
